Discussion/Conclusion

1. Abstracts should consist of a short title (no more than 20 words) and a list of the authors and their addresses followed by an abstract **no more than 200 words in length - title, authors and addresses are NOT part of this word-count.** BCVA reserves the right to shorten abstracts where this guideline is broken.
2. Use single spacing, font size 12, Times New Roman typeface. Sentence case *ie* first letter capitalised of each word, for title and end with a full stop - **do not embolden. Capitalise** initials and first letter of names of authors. Initials should **follow** surname. **Do not** list degrees.
3. Continue with brief address. Where multiple authors come from a number of establishments please link author and address by superscripted numerals. **Leave blank line** between address and abstract.
4. Start text of abstract on **new line without** indentation. Write abstract in the style indicated above. Acknowledgements may be included, where appropriate.
